Mohammad Amin Ahmadi

.NET developer

Summery

Senior .NET Developer with 3+ years of experience designing and maintaining high-performing back-end systems using C#, ASP.NET Core, and Entity Framework Core. I specialize in applying OOP, SOLID, DDD, CQRS, and TDD principles to create clean, maintainable architectures. Over the years, I've built event-driven microservices (RabbitMQ / MassTransit), optimized performance with Redis, and managed CI/CD pipelines using Docker and GitHub Actions.
I love mentoring others and collaborating across product, frontend, and QA to deliver secure, efficient APIs and systems.

Employment History

- **Lead Backend Developer**
  Ide Pardazan Amoozeh (IPA Soft)
  Mar 2023 - Oct 2025
  Key Responsibilities:
  - Led the backend architecture and development of a national-scale multi-tenant SaaS platform for the civil engineering sector using .NET Core, CQRS, and Domain-Driven Design (DDD).
  - Designed and implemented event-driven microservices leveraging MassTransit and RabbitMQ, ensuring scalable and reliable asynchronous communication.
  - Integrated Redis caching and optimized complex database queries to enhance performance and minimize system load.
  - Built and maintained automated CI/CD pipelines with Docker and GitHub Actions for efficient, zero-downtime deployments.
  - Mentored junior and mid-level developers on clean code principles, architectural best practices, and effective unit testing.
  - Collaborated cross-functionally with frontend, product, and QA teams to deliver secure APIs, complex workflows, and payment integrations.
  - Implemented robust API security, logging, and monitoring, while fine-tuning performance for high-load production environments.
  - Actively contributed to Agile development processes, including sprint planning, peer reviews, and retrospectives.

  Key Achievements:
  - Migrated a legacy monolithic application to a microservices architecture, cutting technical debt and improving system scalability.
  - Developed a dynamic reporting and analytics engine with real-time insights and PDF export, enhancing user decision-making capabilities.

Skills

.NET Core / ASP.NET Core

CQRS & MediatR

Domain-Driven Design (DDD)

Clean Architecture / Design Patterns

Multitenancy

API Gateway & Nginx

Microservices Architecture

RabbitMQ / MassTransit

Event-Driven Systems

SQL Server

MongoDB

Redis (Caching)

Elastic Search

MinIO (Object Storage Control)

Docker & Docker Compose

CI/CD (GitHub Actions)

Agile/Scrum Participation

Code Review & Mentoring

Authentication & Authorization

Single Sign-On (SSO)

Language

English

- **Junior Backend Developer**
  Ide Pardazan Amoozeh (IPA Soft) (Esfahan, Iran)
  Aug 2022 - May 2022
  - Supported backend development tasks including API endpoints, database queries, and bug fixes.
  - Learned and applied CQRS and Domain-Driven Design principles under senior developer guidance.
  - Assisted in writing automated tests and maintaining CI/CD pipelines.
  - Participated in code reviews and sprint planning meetings.

Education

- **B.Sc. in Software Engineering**
  Islamic Azad University of Esfahan
  - GPA: 17.24/20
  - Teaching Assistant in software architecture and back-end labs for two semesters.
  - Co-developed internal attendance-tracking software for the university.

References

- **Arman Karbassi (CEO) from Ide Pardazan Amoozeh (IPA Soft)**
  09134041709

Extra Curricular Activities

- **Teaching Assistant (TA) at Azad University**
  Oct 2023 - Mar 2024
  Assisted in teaching undergraduate students the fundamentals of C# programming, object-oriented design, and software development best practices. Supported the course instructor in preparing lesson materials, designing coding exercises, and conducting lab sessions focused on topics such as data structures, LINQ, and asynchronous programming in .NET.
